fuel-cycle facilities. These efforts include research related to materials behavior and performance in high temperature applications. The purpose of such research is to determine the effectiveness, and improve as necessary, the NRC licensing requirements and codes for metallurgical and structural mechanics aspects of the safety system of commercial nuclear power plants and other nuclear fuel-cycle facilities. Develops corresponding regulatory guides, codes and standards to implement research findings.

field of materials engineering or related major field of study, or equivalent combination of education, training, and experience.

All candidates must also have SPECIALIZED EXPERIENCE applying the theories, principles and practices of materials engineering relating to commercial nuclear power plants and other nuclear fuel-cycle facilities. At least one year of this experience must be at the next lower grade level or equivalent.

under high-temperature applications.

(EXAMPLE: Describe specific training, education, and work experience that indicate your thorough knowledge of materials behavior, irradiation and environmental effects, and structural mechanics and fracture mechanics, as applied to light water and non-light water nuclear power plants. Include specific examples dealing with high-temperature applications of materials.)

2. Demonstrated knowledge and experience in general materials engineering as applied to design analyses, or research and development for commercial nuclear reactor materials, or similar applications.

(EXAMPLE: Describe specific training, education, and work experience that indicate your understanding of overall materials engineering including areas such as metallurgy, welding, other fabrication processes, and fatigue. Demonstrate your knowledge of applicable consensus codes and standards in these technical areas. Include specific examples of use/development of codes and standards related to high-temperature applications.)

3. Demonstrated ability to anticipate problem areas and develop research

programs leading to their resolution.

(EXAMPLE: Provide examples of relevant research programs you have developed and managed, with a focus on identification of problem areas and processes used to achieve resolution.)

4. Demonstrated ability to independently plan, direct, and manage complex, highly technical research contracts.

(EXAMPLE: Describe specific training, education, and experience that demonstrates your ability to manage complex, technical research contracts. Describe your specific role in the oversight and direction of contracts.)

5. Demonstrated ability to communicate complex technical issues both orally and in writing. This rating factor encompasses evidence of presentations at technical meetings, conferences or symposia, both nationally and internationally. Attach samples of written articles in journals or technical reports.

(EXAMPLE: Describe the reports, presentations at technical meetings, conferences, or symposia, both nationally and internationally which demonstrate your capability in the above areas. Describe work assignments that demonstrate your ability to communicate technical objectives, results, and findings of research studies and programs. Attach samples of written articles in journals or technical reports.)

NOTE: BREADTH, RECENCY, AND LENGTH OF EXPERIENCE IN THE FIELD; TRAINING, AWARDS AND COMMENDATIONS; PAST AND CURRENT PERFORMANCE; AND COMMUNITY OR OUTSIDE PROFESSIONAL ACTIVITIES WILL BE CONSIDERED AS THEY RELATE TO EACH OF THE ABOVE FACTORS TO DETERMINE THE LEVEL OF KNOWLEDGE, SKILL OR ABILITY OF CANDIDATES.

NOTE: Salary Range: \$76,697 - \$97,108

RECRUITMENT BONUS MAY BE PAID.
